

Lesson 3 — Partial Simulation

Session 3 of 8 | Duration: 60 min | Artifact: 2-min walkthrough of the risk scenarios beat

Purpose

Drill the risk scenarios beat — the language-densest segment, where most B1 speakers run into trouble.

Phases

Time	Phase	Trainer does
0:00–0:05	Warm-up	Revisit the five-beat structure on screen. Show the language bank from L2.
0:05–0:20	Brief the segment	Hand out the L4 customer profile (preview below). Today learners do only the risk scenarios beat — 2 minutes.
0:20–0:35	Planning	Each learner notes their 2–3 attack scenarios and the matching current recovery position. Language bank visible. Each scenario must be paired with a recovery outcome — never named alone.
0:35–0:55	Performance	Each learner records a 2-min risk scenarios beat for the same customer.
0:55–1:00	Close	One observation on language: where the scenario–recovery pairing held; where it broke. Save recordings.

Scripted teacher language

“You’re not doing the full briefing today. Only the risk scenarios. 2 minutes.”

“Every scenario gets a recovery position. Never name a scenario alone. “There’s a risk of encryption” is not enough — pair it with “if that happens, the current recovery position is X, with expected downtime Y.””

“Language bank stays visible. Use the phrases.”

Customer — risk scenarios beat only

Customer preview: Aurum Manufacturing — global manufacturer of precision components, 14,000 employees across 8 countries. The CISO requested a readiness review three weeks after a publicly-disclosed competitor breach. The estate is mixed VMware on-prem (manufacturing execution systems, SAP ECC), Hyper-V in two regional datacenters, and AWS for analytics workloads. Backups go to two separate repositories but neither is immutable. Edge sites (12 plants) back up locally with 7-day retention.

The segment: Walk through the risk scenarios beat only. 2 minutes. Name the top 2–3 attack scenarios. Pair each with the customer’s current recovery position and expected downtime.

Between-session work

No homework. The full L4 customer profile will be handed out next session for fresh reading.

Artifact

2-min recording per learner, risk scenarios beat only. Save as
